BENEFITS OF UPVC DOORS AND WINDOWS

DURABILITY

uPVC Doors and Windows do not warp, twist or split. Impact modifiers in our profiles are treated with special additives making them long lasting.

SOUND INSULATION

uPVC Doors and Windows not only provide thermal insulation but also special sound insulation. Double glass units can help in sound reduction upto 30 Db .

IAQ

Indoor Air Quality can be maintained by avoiding interior energy loss. Our products reduce energy loss by over 30% thereby reducing energy costs.

IMPACT RESISTANCE :-

uPVC Doors and Windows are uniquely designed and specially formulated to withstand high impacts during handling and installation.

AESTHETICS

uPVC Doors and Windows are adaptable to develop attractive designs, ranges and wooden finish laminated profiles with best quality.

UV Resistance

uPVC Doors and Windows offer 100% UV resistance with the right amount of TiO₂, Which helps in retaining whiteness against exposure to the sun.

TERMITE & CORROSION RESISTANCE

uPVC Doors and Windows are termite and corrosion resistant. Salts, acids, alkali and waste gases can not corrode the window system.

MAINTENANCE FREE:-

uPVC Doors and Windows are virtually dirt resistant and easy to maintain and can be clean with normal soap water.

BUG MESH OPTIONS

Mosquitos and other bugs are a big menace. To Protect against insects, We have bug mesh options available for our sliding systems

FIRE RETARDANT

Our windows are fire retardant. uPVC profiles can only ignite at temperatures of 391°C or above, whereas wood ignites at 260°C.

EXCELLENT COST BENEFIT RATIO

uPVC Doors and Windows are overall cost effective compared to Timber frames and save a lot of costs in terms of maintenance & saving energy.

DESIGN FREEDOM

A creative assortment of profiles mix-matched with combinations like bay, coupled windows, combination window, etc is our forte.

UPVC WINDOWS

UPVC Sliding Window

An UPVC Sliding window comprise of frames that can slide back and forth. The technical term for frames here is sash. With great ventilation and aesthetics, UPVC sliding windows offer unmatched high-quality PVC frames for Home and Offices.

Casement UPVC Window

Casement windows are usually wide and instead of having the usual sliding mechanism to close or open, it has an open and shut feature. This feature allows you to open them all the way, increasing the ventilation and amount of natural light of the space they're installed in. As casement windows are highly energy-efficient.

Top Hung UPVC Window

op Hung Windows are a combination of casement and window frame. Frames are attached to the casement via hinge on top side of the casement which allows the window to swing open outward and can be stopped at a position through high-quality steel friction stays.

UPVC WINDOWS

Tilt and Turn UPVC Window

Tilt and Turn window gives the flexibility of choosing it as a source of ventilation or as a standard window. Tilt the top of sash and open inward at an angle to use it for ventilation purposes else swing the complete sash inward and use it like your standard window.

Combination UPVC Window

Combination windows are one of the most unique styles of windows that you can incorporate in your space. An integration of sliding, casement, and fixed windows; combination upvc windows can be designed and customized as per your need and size requirement.

Villa UPVC Window

Villa Windows are a unique combination of elegant design, unmatched performance, and great style. They come with an added iron grill that ensures extra safety and maximum protection. They also have a double sash and come with the option to add a bug mesh.

UPVC DOORS

Sliding UPVC Doors

Sliding doors are made up of glass panes, they provide you an unobstructed outside view. Moreover, owing to their structure and design, they create a seamless flow between the indoors and the outdoors, offering panoramic views suited for closets in hallways, lobbies, terraces.

Casement UPVC Door

Casement UPVC Doors can be installed as a single or a double sash creating a graceful main entrance. UPVC casement doors are very versatile and are widely used for both exteriors and interiors of homes as well as offices. They are available in a wide variety of frames.

Slide and Fold UPVC Door

Folding & Sliding Doors can be just the architectural feature that makes your home stand out. Choosing to install sliding & folding doors will prove to be a brilliant addition for your home. Usually these doors are heavy duty from the security point of view and have multi locking points.

Lift & Slide UPVC Door

Lift and Slide UPVC range of sliding doors are designed to accommodate large openings, creating expansive glass walls with unusually large panels. These glass doors give your home the convenience and space, which a hinged door cannot provide. They can be built straight, curved.

Aluminium Window

Aluminium Sliding Window

The aluminium sliding windows feature two or more sashes that horizontally pass each other in the frame. Both white aluminium windows and colour aluminium windows retain their colour and are low maintenance due to few moving parts. Aluminium windows are completely weather sealed around its frame.

Aluminium Top Hung Window

These Windows are a combination of casement and window frame both made with high-grade Aluminum. Frame is attached to the casement via hinge on top side of the casement which allows the window to swing open outward and can be stopped at a position through high-quality steel friction stays.

Aluminium Tilt & Turn Window

Tilt & Turn windows are made from strong and lightweight Aluminium Profiles. They can accommodate large expanses of glass with slim frames for maximized natural light intake. As well as a restricted tilt facility for safety, they provide excellent ventilation capacity and easy cleaning access.

Aluminum Side Hung Window

Aluminum Side Hung Window is a frame coupled with standard British design that is suited for residential market is what that defines Aluminum side hung windows. With the choice of glass and choice of Aluminum Frame, JLM Impex's Side Hung Windows are offered in various profiles.

Aluminium Window

Aluminium Sliding Doors

Aluminium Sliding Doors are preferred over conventional doors as they are compact and occupy less space. The Aluminium frames provide an elegant and glossy look, enhancing the aesthetics of the space. These Aluminium doors are more durable and secure than other doors.

Aluminium Casement Doors

Aluminium casement doors are popular door designs that can add elegance to any type of setting. They come in a charming profile, they have gradually become the ideal choice for many homeowners. These doors can easily swing outwards or inwards and give great view other side as well.

Slide and Fold Aluminium Door

Slide and Fold Aluminium Door can either be opened partially for easy access or wall to wall for an unobstructed view. Slide and Fold Aluminium doors are energy efficient, built to last, and provide better ventilation along with enhanced heat insulation to keep the temperature cool inside.

KEEP UNWANTED NOISE AT BAY 

Effective Sound Insulation

Keep unwanted noise at bay with our JLM Impex window systems. Specially designed to reduce the amount of sound entering or escaping from your home, they also add an additional layer of security. These windows are ideal for the present busy lifestyle - or simply if you want to enjoy a quiet life!

Recommended interior noise levels

Environment	dB
Library	30-40
Bedroom	30-40
Classroom	35-40
Living Room	40-45
Private Office	40-45
Open Office	45-50

Prominence windows are engineered to reduce sound transmission. The Multi chambered profiles, fusion Welded joints, Multipoint locking mechanism, and dual compression gaskets ensure that there is no sound infiltration. When combined with recommended Glazing & Hardwares, Prominence window system can insulate your indoors from unwanted sounds upto 40 db.

Decibel Comparison Chart

Efficiency that Exceeds your expectations

The process of installation of UPVC Windows and Doors starts from the site survey during plastering work of the building. Measurements are taken in height, width and diagonal with the advice of the site engineers. The sizes and designs of windows with the appropriate placements are confirmed with the engineer, The installation windows are positioned exactly with the tube level and plumb level. They are perfectly screwed with hanger fastener screws using hammering machines so that the windows hold on to the walls. They are then sealed properly with silicon sealant that ensures tight packing, without any clearance

Energy Saving

Windows typically occupy about 13 to 20 percent of the area of the walls. Windows not only add aesthetic looks and often a very important aspect of a home, but also a very significant component of home heating and cooling costs. Poor windows lose more heat per square foot of area in winter and gain more heat in summer than any other surface in the home.

Today, prominence have changed the energy performance of windows in radical way. Prommance energy ON tent minclow systems will make your home more comfortable, drama. allr reduce your energy costs and help to create a brighter, c leaner healthier environment by reducing your carbon footprint

A touch of the sublime

Choice of aesthetically pleasing laminates for our profiles

JLM Impex offers a wide range of laminate options ranging from contemporary colours to wooden Textures. We provide colours that are best suited for your homes. Our laminates are imported from Europe. They are equipped to deal with tropical weather and come with 20 years warranty.

Wooden textures have always been an evergreen choice when it comes to beautifying our properties. In a bid to preserve nature, wooden textured laminates are a perfect replacement.
